

PackStudio3D

Configure. Decorate. Discover. Share.
Explore a whole new world of packaging possibilities!

PackStudio3D is the world's first browser-based 3D packaging configurator and visualizer that gives non-technical users the ability to create instant virtual prototypes. PackStudio3D speeds up the new product development process and enhances innovation.

www.packstudio3d.com

for Packaging Suppliers

The cost-effective way to instantly launch and share new or existing products globally

Enhance your web site or create an app with an amazing interactive 3D product experience

Take your whole product portfolio with you on your iPad or laptop offline

Share design concepts/ideas and build private catalogs for key customers

Publish public models to Webpackaging to garner exposure and leads

for Brands & Retailers

See design ideas instantly and accelerate innovation with no costly, specialized software

Experiment with colours, materials, backgrounds, artwork, and different pack configurations

Speed up the new product development process and get to market more quickly

Build internal libraries of existing product launches for future reference and development

Collaborate with your team, suppliers, design agencies, brand consultants, and others
